

Virgin America has confirmed it will launch new flights to the Mexican holiday destination of Puerto Vallarta.

Beginning in December, the carrier will fly from San Francisco in an attempt to capture its slice of the burgeoning holiday market in the region.

It will be the third destination in Mexico offered by the carrier.

“We are pleased to offer our new low-fare flights to travellers looking to kick off their vacations to Puerto Vallarta in style,” said Ross Bonanno, vice president of airports and guest services at Virgin America.

Located on the Pacific Coast where the states of Jalisco and Nayarit meet, Puerto Vallarta is one of Mexico’s hottest destinations – with a rich cultural tradition, a historic cobblestone downtown, family-friendly attractions and world-class resorts.

200 countries listed. Each is developed by the City.Mobi team to combine into a single global travel directory.
